

FAUXWOOD VENETIAN COLLECTION

Scandi Oak

SUNWOOD®

FAUXWOOD VENETIAN COLLECTION

We are proud to present a fauxwood collection, created with high-quality and durable PVC, reducing the impact on forests and providing a reliable, long-lasting blind. This exquisite collection is expertly crafted to capture the authentic look and feel of real wood.

Choose from an embossed, rich grain effect, creating a sense of depth and texture that mirrors the organic patterns found in genuine wood. An intricate wood grain design seamlessly blends nature-inspired aesthetics with modern functionality.

INTRODUCING

The Sunwood Fauxwood Collection has been crafted with meticulous attention to detail to accentuate interior window treatments epitomising a harmony of style, technology, and practicality.

Mission Fine Grain

Exuding sophistication & charm, the highlight of the Fauxwood Collection is the *beautifully curated* grain colourways.

Each colourway has been carefully selected to complement a variety of interior styles, creating a harmonious blend between the natural world and modern living.

Scandi Oak perfectly complements the warmth of Scandi wood interiors and flooring. Lunar Oak with its tone-on-tone grain suits today's interior preference for grey, whilst Arctic Oak presents a beautiful grey grain on white base, offering a subtle wood grain texture and aesthetic.

HeatShield Technology

DURABLE

The *perfect* solution for Kitchens, Bathrooms & Wetrooms

Chroma and Abyss have been crafted using Heatshield technology, a revolutionary PVC plus composition, which offers unparalleled heat stability, enabling your Sunwood Fauxwood blinds to be exposed to direct sunlight without any fear of warping, ensuring lasting performance and durability.

Designed with convenience in mind, every Sunwood Fauxwood blind is easy to maintain and clean, allowing them to stand the test of time, presenting beauty and functionality.

Easy to maintain & made to last

Unlike real wood, fauxwood is moisture resistant, making it suitable for high moisture environments. Offering the ultimate collection, Sunwood Fauxwood is stylish, elegant and resilient to the demands of everyday living, making it perfect for any room.

Lunar Oak with 25mm Lunar Tapes

Tape Collection

Choose from twenty-four 25mm & 38mm width contemporary tape colours, with a choice of sophisticated herringbone, or unique flatweave tapes to add a stunning harmonious finish.

Mix complimentary or contrasting shades to transform your interior space.

Serene with 38mm Cotton Tapes

Child Safety

Every Sunwood Fauxwood blind is manufactured to the highest standard and in line with Child Safety legislation EN13120, giving you peace of mind that your blind is child safe.

Total control *all the time*

Increase *energy efficiency* by making your blinds smart

Maximise your home's energy efficiency by making your Sunwood Fauxwood smart. Smart home integration is made simple with Cruze and Somfy.

When connected with smart home devices, set timers to close your blinds in order to retain as much heat as possible, wherever you are. Allowing you to return to a comfortable home while helping to reduce energy bills. During the colder months you may want to set your motorised blinds to remain open while the sun is shining, and time them to shut when the sun sets.

Motorised blinds still provide a range of energy-saving benefits during the summer months too.

Setting your timers to close blinds when the sun is shining can help to block heat from entering your home, helping to reduce the need for air conditioning and ensuring a comfortable temperature is reached.

Motorising blinds can offer ultimate privacy and security for your home. Easily set timers to make the impression that there is someone at home, allowing you to have your blinds opened during the day and shut in the evening.

Embrace the future of home automation with our Venetian blinds, where technology meets timeless elegance.

MOTORISATION

Cruze T50
